What the user's Say About Twitter Mod Apk: I absolutely love this app It works perfectly. The only thing that disappoints me is that @Twitter're not focusing on taking down fake accounts. Like this one that has been many times. @Russell_crowe01 The person behind this account reduces women up to Twitter for the phone app, such as hangouts. He sends them a fake Russell Crowe passport and then starts stealing money from them. I'm a victim and there are many others. Why don't you remove that account here allowing a crime to be committed. Overall, it's good. But there is a serious bug in this app. I have twitter on some devices, including Windows. When there are new messages, I open the Windows application and I see this and even after replying to that message, it shows the same notification of new messages on my phone as well. Tell him I haven't used my phone app for a week, but I used windows one. It would show the messages all week (no matter if I read it or not) on my phone. It's so frustrating. Help people with language problems help them translate and read the language as they do on Twitter. Twitter is being used by many blind people. They can't read the letters in the photographs. If you have the ability to turn photos into sound or text, please be very cautious. Features of Twitter Mod Apk? I hope you fix this as soon as possible, thank you and have a good day ☺ please correct the direct message ☺ because I love these josh holderness apps so much: so if you're like me, you've come to the page of this app because the official Twitter app is ridiculously slow. Well, luckily for you, this app fixes this and then some. Twitter's fastest load times I've seen no bar. Absolutely worth the money you use Twitter more than once a week. Recommend. Mwape S: This is simply the best. I'm not using a paid version, but I don't think I need one. Guys, you're going to love this app trust me. This made me uninstall the twitter app. All media are easily downloaded. One thing though, please add the blue tweeter icon in the upper left corner of the screen. We have to recognize the great jobs that the Tweeter developer, despite adding to his innovation, is still his idea. Idea.
